

NFB Fire Tube Boiler

Navien, Inc. (115)

The Navien NFB Fire Tube Boiler is designed with an all-new patented, form-pressed and robotic laser-welded, stainless steel heat exchanger with a one-piece combustion chamber. Available in 175,000 and 199,900 Btu/h models, the NFB features a 10:1 turn down ratio, 95% AFUE, advanced integrated controls, remote access via NaviLink™, field-gas convertibility, extremely low NOx levels and ease of installation.
