

Aqua² Tankless Water Heater

Radiant Hydronics (628)

Radiant's Aqua² tankless water heater is the first of its kind, combining the robust features of a boiler into a tankless water heater! Equipped with FlowTech® technology, Radiant's Aqua² offers a single coil T316 stainless steel engine that satisfies large hot water load without compromising pressure. Installation and service friendly, the Aqua² is a perfect solution for hard water conditions.
