

# Dry Steam Coil & Surface Cleaner

## SpeedClean (555)

Our Dry Steam Coil & Surface Cleaner superheats water vapor to produce a 235-degree steam, at only 10% moisture content. This means that surfaces are cleaned and sanitized with very little water residue remaining. It removes oils, grease and dirt; perfect for mini-splits, condensers, refrigerators coil cleaning. Also great for cooler and freezer seals, ductwork, exhaust fans and more!
