

HeatMaster TC

Triangle Tube (215)

Heatmaster TC combination high-efficiency boiler and water heater is the only storage combination boiler in the world to fully condense in both space heating and domestic water heating modes. This amazing accomplishment in engineering can be used as a stand-alone high output domestic water heater or as a high output combination boiler/water heater. The Heatmaster TC is available in two sizes, 240 & 399 MBH.
