

Vitotrans 300

Viessmann Manufacturing Company Inc. (143)

A packaged heat exchanger DHW system, offering a “turn key” solution for commercial applications requiring high volumes of domestic hot water, such as hospitals, universities, government buildings, large hotels, resorts and recreational complexes. Designed as an extension to an existing heating boiler, the Vitotrans 300 accurately provides 5 – 90 gpm of DHW when combined with a DHW buffer tank.
