

**CIPHEX West 2023**

# **NEW PRODUCT**

**Grundfos**

**ALPHA 15-58**

**Category: Hydronic Heating**

ALPHA is a high-efficiency circulator fitted with an ECM motor and designed for circulating liquids in heating and cooling systems. ALPHA is designed with intelligent controls featuring a constant-pressure, proportional-pressure and constant-speed curve, each with three speed settings as well as AUTOADAPT setting. The Grundfos GO app also provides the ability to conveniently troubleshoot your system through the event log, run guided setup, set custom control modes, and run firmware updates. Historical trend data for flow, head, media temperature and on-cycle durations is also available.
