NEW PRODUCT

Reliance Worldwide Corporation (RWC)

EB25 PLUS

Category: Plumbing and Piping

The EB25 PLUS brings state-of-the-art water control technology to pressure regulators for the commercial, hi-rise and institutional markets. The accurate flow control and pressure regulation of the EB 25 PLUS eliminates costly multi-valve installation, such as high-low valves installed in parallel to meet varying flow requirements or multi-valves installed in series to reduce high inlet pressures to desired line pressure.
