Solstice R32 Air-to-Water Heat Pump

Category: Hydronic Heating

SpacePak's newest Solstice air-to-water heat pump utilizes eco-friendly R32 refrigerant in an environmentally safe monobloc design and provides a 3-in-1 solution for heating, cooling and DHW. The quietest design on the market also offers record-breaking cold climate heating performance in outdoor air temperatures as low as -22°F (-30°C). Availability of multiple sizes meet wide-ranging needs for applications large and small.
